Profile

Passionate Full Stack Web Developer and AI/ML Engineer focused on building scalable web applications and intelligent software solutions. Experienced in MERN Stack development, machine learning model development, and real-time AI applications. Skilled in React.js, Node.js, Express.js, MongoDB, Python, with knowledge of software testing practices.

Experience

July2025

LITZTECH,Coimbatore

Web Development Intern

Worked on responsive UI development using HTML, CSS, and JavaScript. Contributed to Re-act.js dashboard features, optimised performance, and collaborated with the team using Git/GitHub.

July2026

GRADTWIN,Chennai

Machine Learning Intern

Built a full-stack Intrusion Detection System using React, Node.js, Flask, and MongoDB with ensemble machine learning. Implemented real-time network monitoring, live traffic analysis, and attack detection using Scapy and CICIDS2017.

Testing Experience

- Wrote comprehensive test cases for multiple personal projects.
- Learned to create BDD (Behaviour-Driven Development) scenarios.
- Performed manual testing to verify functionality and input validation.
- Tested applications across devices and browsers to ensure consistent cross-platform performance.

Projects

MERNStack

[GitHub](#)

Women Self Help Group (SHG)

Full-featured MERN platform for efficient SHG management and collaboration among group members.

Node.js-MongoDB

[GitHub](#)

TurfBooking

Web-based platform enabling users to search, reserve, and manage sports grounds efficiently with real-time availability.

MERN Stack.Python .Flask.ML
